A Little History

T. H. Gold

Deceased

MR. T. H. GOLD, whose portrait appears on this page, was the founder of the business now carried on under the firm name of THE GOLD NURSERY COMPANY, at Mason City, West Virginia.

Away back in the year 1869, more than 60 years ago, Mr. Gold began in a very small way, on his farm in Bedford Township, Meigs County, Ohio, to grow trees and plants for his neighbors and the trade near him. By careful study of the business, prudent management and honest dealing his trade increased from year to year, until his sons grew up. They took an active interest in the business, and soon the firm's name became "T. H. Gold & Sons."

In 1899, the business having outgrown the Bedford township farm, a large tract of land was secured at Mason City, West

Virginia, and the business transferred to that point. This tract has since been enlarged from time to time as the business has been marked by a healthy growth from the beginning. This change gave greater convenience of shipment, enlarged the output, and the business, nourished in its infancy and given a successful start in life by Mr. Gold, was ready for its long, vigorous and useful existence.

About this time Mr. T. H. Gold retired from the firm and for several years the business was conducted by the firm "Gold Brothers." Subsequently a stock company was formed, the business was incorporated, and the firm name became "THE GOLD NURSERY COMPANY." The active and responsible management is in the hands of W. A. and A. F. Gold, to whom of late years especially, the greater growth of the business is due.

Half Dozen at dozen rates, 50 at 100 rates.

**Sell Half Dozen at Dozen Rates and
50 at 100 Rates**

WATCH YOUR PRICES

Do Not Vary From Them

See wholesale prices for commercial orchards on pages 30 and 31 of this price list.

We warrant our stock to be true to name and of the quality represented, with the expressed understanding and agreement that should any prove not to be true to name, we will replace it with other stock but are not liable for damages other than herein named.

All trees and plants are insured for 1 year against failure. Free replacements are made of the stock reported dead, providing we are notified on or before August 1st, following delivery.

TERMS

All stock is delivered CASH ON DELIVERY.

ASSORTMENT

This price list includes a full assortment of the BEST STRONG growing varieties that are sure to give satisfaction to our customers.

While our assortment of stock is complete and we can furnish any variety called for, we desire our salesmen to CONFINE THEMSELVES TO THE KINDS MENTIONED IN THIS LIST.

WE PAY THE FREIGHT AND MAKE NO CHARGES FOR PACKING.

SELL

Fifty at 100 rates. Half dozen at dozen rates.
Make no variation from these prices.

PRICES

In every instance the price named is entirely in keeping with the high quality of our guaranteed stock. Inferior grades of stock may be bought for less, but poor stock is dear at any price and an experienced planter will not buy it.

FRUIT DEPARTMENT

No home is complete without at least a few fruit trees. Only the very best varieties are offered.

Gold's "Quality First" stock makes good or else we do.

APPLES—Standard

5 to 6 feet, 3 year old \$1.00 each, \$10.00 per 12.
4 to 5 feet, 3 year old .80 each, \$ 9.00 per 12.
3 to 4 feet, furnished in lots of 50 or more, see
wholesale price list No. 46, pages 30 and 31 this book.

All trees guaranteed to be true to name and insured for one year against failure.

We particularly recommend varieties printed in black type.

(S) for Summer; (F) for Fall; (W) for Winter.

Globe (F)	Yellow St. John (F)
Greensboro (F)	

See wholesale price list No. 46 pages 30 and 31 for commercial orchards.

QUINCES

Three and one-half to four feet, very strong, grown in tree form.

Prices \$2.00 each; \$20.00 per 12

Bourgeat	Orange
Champion	Rea's Mammoth

NECTARINES

\$2.00 each; \$22.00 per 12

Boston	Early Violet
--------	--------------

NUT TREES

The constant and growing demand for nuts, and the immense quantities of them yearly imported to meet it, have given a great impetus to the planting of nut bearing trees. So palatable and wholesome are the nut-kernels that they should become a staple article of food here as in Europe. Every garden or lawn should contain one or more of these trees for they are well shaped and supply splendid shade.

Chestnut, American Sweet, 4-5 feet.....	\$3.00
Chestnut, Japan 2-3 feet.....	3.00

ORNAMENTAL DEPARTMENT

We have always contended that the man who by intelligent advice enables his customers to make a proper selection of shrubbery—will soon find that there is a certain bond between himself, his customers and his house that will tend to make boosters, not only for his stock but also for HIM.

Hardy Flowering Shrubs develop very quickly, and are therefore indispensable where it is desirable to make an immediate showing. Whether it is a seasonable or all-year-round effect that is desired, it can be obtained by a judicious planting of shrubs. A good shrub collection will present the greatest variety of color throughout the season, both in flower and foliage.

Shrubs are used for grouping around the foundations of the house in order to take off the sharpness from corners and connect the landscape with the architecture. The home seems to nestle cosily in a nest of green instead of springing up suddenly from the lawn like a "Jack-in-the-box." For filling in the angles of a house and the corners between its steps and sidewalks, for extending architectural lines that end too abruptly, for helping to conceal faulty design, for softening hard, uncompromising masonry such as high retaining walls and buttresses, for giving color to the winter landscape, for making entrances inviting, for taking the curse off wire fences and red brick walls and for framing in the landscape by planting along the borders—that is what the shrubs are used for.

By having a ready reference to the lists given in this book, salesmen are enabled to sell their customers "the right shrub for the right place" and in turn create greater satisfaction—that all-important element—in working up and maintaining a permanent trade.

Varieties in bold face type are the best of their respective kinds and are especially recommended. This applies to the entire price list.

BEST FLOWERING SHRUBS

(D) Denotes shrubs which are dwarf in habit of growth.

(M) Denotes shrubs which are medium tall in habit of growth.

(L) Denotes shrubs which are tall in habit of growth.

ORNAMENTAL VINES

Strong 2 Year Plants

Ornamentals of this class are so hardy, so easily grown, and so beautiful that they deserve greater attention than they receive. They are indispensable for screening porches, covering trellises, tree trunks, walls and stone or brick foundations. Give them a fine rich soil and they will require little attention.

PERENNIALS FOR THE HARDY BORDERS

EXTRA HEAVY CLUMPS

This class of plants contains all the old-fashioned flowers, which for centuries, have been the delight of our forefathers, and are with us today, probably the most popular group in the plant world.

As their name implies, Perennials die down to or near the ground in the autumn, only to come forth with renewed vigor the following Spring.

Of the many ways in which the cultivation of flowers is undertaken, none is so popular as the "mixed" or "hardy" border. They may be planted in front of shrubbery belts, in the kitchen yard, along sides of walks and against walls and buildings.

Semi-formal and formal gardens are also using the perennials to produce harmony of color, charm of effect, and above all seclusion and restful quiet; for the growing of flowers is indeed the simplest yet most satisfying of pleasures.

Owing to the different time of flowering and great variety of color, they will by judicious selection, produce a beautiful effect from early spring until late fall. They are also of great value as cut-flowers.

Perennials to produce the best effects, require a fairly good loam soil which has previously had rotted manure worked into it to a depth of 15 inches. As is true of any class of plants, weeds should be kept out, and it is also desirable to place a straw mulch over them during the winter.

ROSES

Our roses are strong, stocky, two-year-old bushes, field grown and strictly hardy. They have already bloomed one season before being sent out and are in every respect a superior article. Varieties offered are selected for their free blooming qualities, their strong habit of growth and for their ability to adapt themselves to any climate or condition.

Prices \$4.00 each

STREET AND LAWN TREES FOR SHADE OR ORNAMENTAL EFFECT

Under this head we include not only the finest shade trees, but many of those beautiful flowering trees of special color which if properly located, give variety and beauty to the landscape. The initial cost of these trees is small and paid for many times over with the beauty, pleasure and satisfaction which they bring.

We divide the ornamental trees into two classes. Those suitable for street planting (Class S) and those suitable for lawns (Class L).

The sizes mentioned after each variety are those considered as proper for first class trees suitable for transplanting. Every tree is a perfect specimen with a good fibrous root system, good straight stem and a well-branched symmetrical top. The prices quoted are fair, considering the high quality of these trees. We have larger trees to offer and customers desiring larger sizes should submit a list of their requirements to our salesman for special prices which we will be able to quote promptly.

Note—Dozen rate ten times the price of one.

EVERGREENS

It is only by the use of Evergreens that permanent beauty every day in the year can be secured about our homes. Carrying as they do their beautiful, richly colored foliage through the winter, when the deciduous trees and shrubs are leafless, the wintry aspect of our surroundings is wonderfully brightened by their generous use. Every home builder, no matter how small the grounds, needs them.

Notes—Dozen Rates eleven times the price of one.

Our prices are packing free, also delivered to destination. These points plus the fact that all evergreens are dug with ball of earth which is carefully tied up with burlap and if properly planted will grow, and should appeal to the purchaser. Dig the

Evergreens — (Continued)

hole large enough to admit the tree with the ball of earth. Carefully fill in earth around the ball and tramp solid. When through planting, water thoroughly and water through dry spells during first year. We have larger sizes of evergreens, ask for prices.

NOTE: (T) denotes tall growing; (D) denotes dwarf growing; (M) denotes medium growing; (S) following size denotes spread, viz.: Juniper Sabini 12 inch spread. Dozen rates 11 times the price of one.

AGE AT WHICH DIFFERENT TREES SHOULD FRUIT

This varies greatly with different varieties, for instance, the "Duchess" apple often fruits the second year after transplanting, while "Northern Spy" seldom fruits in less than seven years after transplanting though one of the best apples, and a prolific bearer, when of fruiting age. The average time after planting is, for

Apples, Standard, 4 to 5 years	Pears, Standard, 3 to 4 years
Apples, Crab, 2 to 3 yrs.	Grapes, 2 years
Blackberries, 2 years	Peaches, 2 and 3 years
Cherries, 3 to 4 years	Pears, Dwarf, 2 years
Currants, 2 years	Plums, 3 to 4 years
Gooseberries, 2 years	Quinces, 3 to 4 years
	Raspberries, 2 years

Roses generally bloom the season of planting, except climbers and ramblers, which bloom the second season after planting.

Half Dozen at Dozen Rates.

Fifty at 100 Rates. Do not vary from these prices.

If it takes a misrepresentation to make a sale, don't make it.

Varieties in bold face type are best of their respective kinds, and especially recommended. This applies to the entire price list.

Our aim is to furnish the best quality and service for the lowest possible price. You need not fear cheap competition in the least, considering the advantages you have over those of other concerns, in our being able to give your customers complete satisfaction. The thorough salesman never experiences any difficulty in convincing his customers that cheap nursery stock is dear at any price.

See wholesale price list No. 46 for commercial orchards, pages 30 and 31 in this list.

WHOLESALE PRICE LIST NO. 46

The nursery stock sold at these low wholesale prices will not be delivered at the purchaser's residence, but will be shipped direct to the purchaser who is to go to the depot and ask for a shipment in his or her name. While we allow the freight on all wholesale orders, the purchaser pays freight and deducts the amount paid from the bill, sending The Gold Nursery balance, and also the freight or express receipt. It must be understood that any one purchasing from this list must purchase the number indicated therein before they are entitled to these wholesale prices.

All trees and etc., guaranteed to be in perfect growing condition, no money required until stock is examined, satisfaction guaranteed. We will not be responsible for goods after they arrive at the depot. We do, however, agree to replace all stock that fails to grow, free of charge, providing the purchaser receives it promptly on its arrival at the depot. The purchaser must notify The Gold Nursery Co. by August 1st, after delivery giving list of stock that has failed to live. We guarantee all nursery stock to be true to name and in case of error will replace any that proves untrue to label with stock that is true or refund purchase price but are not liable other than herein named.

PEONIES

These magnificent plants are among the showiest and choicest in our gardens. The fragrance and delicate tints and shades of their beautiful flowers render them like the rose practically indispensable. they are absolutely hardy and of the easiest culture. We have a superb collection of varieties in separate colors in both single and double forms.

Named Sorts as follows: Each \$1.25; Per 12, \$13.50

Belle of France (Pink)	Fulgida (Red)
Delicatissima (Pink)	Queen Victoria (White)
Solfatare (Yellow)	Louise Van Houttei (Red)
Festiva Maxima (White)	Triumph du Nord (Pink)
Rubra (Red)	Rosea (Pink)

Some Points About a Thriving, Well Established and Fully Equipped Business

By Artemas Williams, Pomeroy, Ohio

IF YOU ARE IN ANY WAY INTERESTED in orchard, tree, plant and vine culture, it will pay you to visit the Gold Nurseries, operated by The Gold Nursery Company, at Mason City, West Virginia. The writer hereof had the pleasure of taking a trip through the various plants of this up-to-date industry and will set down here some of the impressions obtained by his visit. We found the proprietors thoroughly practical, genial and companionable. They are self-made. They began at the bottom round, and have spent their whole lives at the business. What they now possess both in equipment and experience is the fruit of their efforts.

We were assured and from actual sight and examination were convinced that each year has marked a growth in acres, facilities, experience and trade. Strict personal attention, constant studying and planning at home and through travel, ready adjustment to the changes and advances in the business itself and throughout the country, seeking new markets and extending the trade, a flexible business system, capacity, honesty, industry and integrity—these are the foundation stones on which has been reared the super-structure of a splendid industry.

No better institution for growing and marketing, in prime condition, all sorts of IMPROVED NURSERY STOCK exists in this country. The very latest devices for speed and accuracy, both in fields and offices, are used and no expense, time or effort is spared to secure first-class results. Each branch of the business is under the special charge of a member of the firm.

PERSONAL SUPERVISION

The Nurseries are owned and controlled exclusively by the Golds, and all departments and branches are under the direct supervision of members of the firm and interested in its success. Mr. W. A. Gold has the oversight of all field work preparation of the soil, planting, cultivating, grafting, budding, pruning, digging, packing and shipping. He is assisted by his son Homer Gold who has grown up with the business and who is foreman of the main nurseries at Mason City, also Mr. George Oliver, who is foreman of the branch nurseries at Graham Station, West Virginia. where most of the fruit trees are grown.

Mr. A. F. Gold, has the management of all the office work and sales department. He is assisted by his wife who is in charge of the order division and collecting. The minor work in the office is in charge of competent employees. Six persons are employed in the office which is equipped with all modern conveniences and labor saving devices.

Ample Facilities For Speedy Packing and Shipping

The perishable nature of the product requires that care and haste be used in marketing. So the packing houses and grounds are supplied with the latest contrivances for packing and shipping, so that when the stock is ready for the spring and fall market, and all the energies of the working force are to transfer the product from the fields to market no time is lost. The stock is conveyed from the fields to the packing grounds and kept fresh by the splendid water system, while day and night shifts of the skilled workmen are employed in crating orders.

ELECTRIC LIGHT AND WATER SYSTEM

A splendid water system is maintained by which an abundance of pure water from the gravel strata underlying on the Ohio River is forced to all parts of this plant, for use in the various departments, residences and lawns and for protection in case of fire. A fully equipped electric light and storage plant furnishes ample light for all points on the grounds, lawns, etc.

OTHER FACILITIES

Besides the facilities heretofore named there are connected with the plant a planing mill and carpenter shop, in which are made all the crates, boxes and other conveniences for the firm's business. All sorts of modern field machinery are kept and added to as occasion requires. A full supply of automobiles and other vehicles add to the completeness of the equipment for use in the various activities of the firm and to carry interested visitors to all parts of the plant and its branches.

Two commodious residences, furnished with ample modern outfits, are set amid lawns adorned with all kinds of ornamental shade and fruit trees and all sorts of farm and produce as well as other articles for use in the business, are grown on the farms in connection with the plant.

FINANCIAL STABILITY

From its earliest history, through the business experiences of about fifty-five years this firm has been especially noted for its financial integrity and soundness. It is a matter of pardonable pride with them that the steady growth and continued success of the business is the result of building it solidly on the foundation stones of energy, ability and honesty.

This Nursery is by far the largest and most completely equipped in the state and has practically unlimited room for growth. The plant is entirely new and its product young, thrifty and clean; experts pronounce it as good as is grown. The buildings are well kept and the surroundings indicate thrift and industry. The proprietors are hard workers, good managers, and pleasant people to deal with. This we can say after long dealing with them.

A cordial invitation is extended to all interested to visit this plant and inspect its facilities, methods and product.

Address all correspondence to the main office, Mason City, West Virginia.

See wholesale prices No. 46 for commercial orchards, pages 30 and 31.

Never promise a customer a definite date for delivery. We guarantee to deliver at the proper time for planting.

Half Dozen at Dozen Rates.

Fifty at Hundred Rates.

Don't vary from these prices.

Varieties in bold face type are the best of their respective kinds and are especially recommended. This applies to the entire Price List.

If it take a misrepresentation to make a sale, don't make it.

Our aim is to furnish the best quality and service for the lowest possible rate. You need not fear cheap competition in the least, considering the advantages you have over those of other concerns, in our being able to give customers complete satisfaction. The thorough salesman never experiences any difficulty in convincing his customers that cheap nursery stock is dear at any price.
